
Cookies Policy

We use cookies across our site to help improve its performance, to enhance the user experience and to support some key site functionality. Which cookies we use, and what we use them for is detailed below.

Cookies are small text files that are stored on your computer by websites you visit. They allow the website to do things such as keep track of your preferences as you move around the site so that we can personalise pages for you and store little bits of information about your visit so these can be stored for your future visits. Cookies stay on your computer for varying amounts of time depending on their type and the parameters the website sets whilst creating them.

Third Party Cookies

Third party cookies are not set by the website you are visiting. They are set by a different organisation whose features are being used by the website you are visiting. This is common practice if sites use analytical systems supplied by a third party (as most are) to track the usage and load on their website. These may also be created by embedded content in the web page as these need their own cookies to work. These can be removed at any time by amending your cookie preferences.

Cookies Key

Cookies come in three different categories. The cookies themselves vary very little between the types but their effect and use is different.

1. Strictly necessary - for the operation of the site.

2. Functional - allow the website to remember choices that customers make and provide enhanced functionality and personal features.
3. Performance - to help to improve the performance of the Koine website.

Disabling Cookies

Each browser has settings which allow you to elect not to allow websites to store cookies on your machine. As each browser is a little different, we advise you to check your browsers help functionality for this option or search for instructions that are specific to your browser.

If you choose to disable cookies, some aspects of this website may not function as intended.

By using our website, you agree to us placing cookies on your computer. Here you can find out more about cookies, how and why we use them and how to manage or delete cookies in your browser.
